

KOSHYS INSTITUTE OF MANAGEMENT STUDIES

INTERNAL QUALITY ASSURANCE CELL

QUALITY INITIATIVES

Mentoring:

Context: our college have class teachers for each classes coming under the different programs, they are in charge of handling over the attendance, Examination progress reports after every exam conducted wherein they were only concentrating on the academic progress, with not much opportunity to identify the strength, weakness in personal life of the students and to guide them to overcome this problem, the mentoring system was adopted in the college.

The practice:

The mentorship is assigned to each member of the faculty based on the class and subject they handle. Each faculty assigned with 30-40 students and she/he mentor for all the three years. The mentor book is designed by the institution and given to all the students where they have to record all the personal details including his/her family and the academic details in the book.

So the mentorship helps the students to understand the organization culture and also they can share their personal issues.

Feedback mechanism:

Our institution adopted feedback mechanism to understand the challenges faced by the students. It is helping the faculties to know about the specific requirements of the students and do the changes for the betterment.

Data use to be collected through questionnaire and the questions are pre determined and given to the students. The collected data is going to be analyzed and Based on these necessary actions will be taken.
