Academic activities

CEO Talk - Recent trends in HR

Koshys Institute of Management Studies had organized a guest lecture on Recent Trends in HR- the Indian Perspective for the students of MBA - I. The Speaker for the lecture was JayaRaj Menon who is presently working as CEO with Kranium Hr. Solutions,

In his lecture he discussed the Western and the Indian Ideologies of looking at innovation from the ancient times till the present day. He also introduced the participants to many exclusive examples and challenges in the world economy at large with reference to different mythologies He shared his own experiences how and why Western corporations can no longer just rely on the old formula that sustained innovation and growth for decades: a mix of top-down strategies, expensive R&D projects and rigid, highly structured innovation processes.

Guest Lecture - Talent Beyond 2020

In 2019, 99% of companies decided on preparing for the future workforce. Furthermore, 73% of companies expected a significant disruption, says Princy Thomas. Well, 2020 is knocking at our doors. Where we're stationed at? Do we still have the time to personalize other trends?

Talent management is the new engine for the upcoming economy. With more and more companies looking to thrive in an uncertain situation today, more attention is being focused on the role of talent development.

In the same manner, companies today are seeking newer processes and techniques to keep the current workforce engaged. However, there are certain challenges that HR and talent management professionals are facing.

Industrial Visit – Mahatma Gandhi Institute of Rural Energy and Development

Industrial Visit is of prime importance for students pursuing MBA Program. It assists in bridging the gap between theory and practice. The MBA department of New Horizon College of Engineering has organized an Industrial Visit to Mahatma Gandhi Institute of Rural Energy and Development (MGIRED), Bengaluru on 10-08-2018. The first semester MBA students along with the faculty coordinator were taken out for the Industrial Visit. The Journey towards the MGIRED started by 9:15 AM and reached the Institute by 10:45 AM.

Firstly, they introduced about the role of MGIRED in creating awareness regarding solar power generation, Rainwater harvesting and solid waste management. The Institute also provide training for unemployed youths for solar panel installation. The first session was regarding solar power, and in this session they highlighted about the advantages of solar power, advantages of using LED bulbs as a power saving equipment. The second session was about rain water harvesting, and in this session they highlighted the importance of storing the rain water for future use and the role of rain water in increasing the ground water level. The third session was about solid waste management, in this session they highlighted about managing the waste properly in order to maintain the fertility of the soil and these wastes should block the drainage system. Then the students were taken to exhibition halls where various equipment's were kept in the display. Finally, students gave feedback about all the sessions. Post lunch session, students were allowed to visit the museum. The visit ended by 3:30 PM and we have returned back to the college. On the whole, this visit helped the students in gaining insights regarding solar power, rain water harvesting and solid waste management which is the need of the hour in the current contemporary context.
